# Concept Statement

Inside Guide is an app designed to help you create your ideal home, the easy way. Catalogue your existing furniture, look for more furniture that fits your aesthetic. It takes color, style, and size of items into account, as well as past furniture items you've bought. All this helps what items are suggested.

As a young adult, I've noticed it's especially hard to find furniture that really matches my vision and price range. I've talked to others, and it seems this is a really common problem, even outside of my age group. My app would make sourcing furniture much easier, for everyone.

# Persona 1: Savvy Planner

**Age:** 18  
**Job:** Student

## User Narrative and Scenario

The Savvy Planner is really excited to move into their dorm, but hasn't ever furnished a place of their own before. What are they supposed to buy? They don't know!

School doesn't start for a few months, but the Dorm Decorator wants to get a headstart. They want color coordination, financial planning, spacial planning, the whole nine yards- before they even move in!

## Pains, Problems, and Frustrations    User Needs

- |   |  |
|---|--|
| <ol style="list-style-type: none"><li>1. The Savvy Planner doesn't know much about buy furniture or decorating.</li></ol> | <ol style="list-style-type: none"><li>1. Helpful decoration guides, specialized for students</li><li>2. Color coordination and spacial features</li><li>3. Purchase options and comparison</li></ol> |
|---|--|

## Agile User Stories (Forms and Shapes USER FEATURE)

1. As a newcomer to interior design, I want to be able to learn how to decorate a place of my own.
2. As a newcomer to interior design, I want to be able to access helpful guides that can help inform my buying decision.
3. As a financially savvy individual, I want to be able to compare prices on furniture items and buy the one best suited to my situation.

## Persona 2: Home Perfectionist

**Age:** 40  
**Job:** SAHM  
**Gender:** Female

### User Narrative and Scenario

The Home Perfectionist has owned her home for 4 years, but still has trouble finding ideal decorations for the furniture she has. She has a unique Bohemian taste that is hard to find, even online.

As a stay-at-home mom with one young child, she has some free time to search for furniture, but not as much as she'd like; she is also limited to online shopping.

### Pains, Problems, and Frustrations

1. The Home Perfectionist isn't as tech-savvy as some of her friends and likes redundancy in systems.
2. She has limited time to search for items.
3. She is looking for items in a specific style.

### User Needs

1. User-friendly system
2. Item suggestions based on past likes/dislikes
3. Specific style tags on pieces of furniture

### Agile User Stories (Forms and Shapes)

1. As a user I want to be able to find items that meet the style parameters of what I'm looking for easily.
2. As a user I want to be able to reap the benefits of the app without having to invest time in learning how to use it.

## Persona 3: Design Dunce

**Age:** 33  
**Job:** Accountant  
**Gender:** Male

### User Narrative and Scenario

The Design Dunce has been told repeatedly by his mother and girlfriends that his home needs the touch of a designer and is finally desperate enough to look into it. It's so bad that his dates take one look at his apartment and leave.

Although he's not very artistic, the Design Dunce has expendable income he's willing to invest in his domicile, and plenty of space around his Nintendo Switch setup. He just needs a helping hand to guide him.

### Pains, Problems, and Frustrations

1. The Dunce doesn't know anything about building an inviting room.

### User Needs

1. User-friendly guide to design
2. Survey to help users choose what style they are going for
3. Suggestions based on the design survey, to help users get started.

### Agile User Stories (Forms and Shapes)

1. As a beginner to interior design, I want to be able to purchase items that look good from the point of view of others.
2. As a user I want to be able to find my own style that appeals to me and buy items fitting that style.
3. As a beginner to interior design, I want to learn how to build a space that feels inviting.

## Persona 4: Busy Bee

**Age:** 30  
**Job:** Graphic Designer  
**Gender:** Female

### User Narrative and Scenario

The Busy Bee has a lot on her plate with her job, social life, and home life. She often can't keep track of what she's already bought for her home, or remember what she needs once she steps in a store. She's too busy for that!

What's worse, she will forget the exact colors of things she's already bought. This is a problem, because when she brings new purchases home, they hardly ever match!

### Pains, Problems, and Frustrations

1. The Busy Bee doesn't have a lot of time to spend on any apps.
2. The Busy Bee frequently forgets what she's looking for.

### User Needs

1. Easy-to-use ability to catalogue current furniture items
2. Color-matching feature
3. List feature to help keep track of items the user still needs

### Agile User Stories (Forms and Shapes)

1. As a busy person, I want to be able to use the app quickly and intuitively.
2. As a forgetful person, I want an easy-to-access reminder of what I set out to do in the first place.
3. As a forgetful person, I want to be able to catalogue items I already have, so that I can color-match them in stores.

# Competitive Research

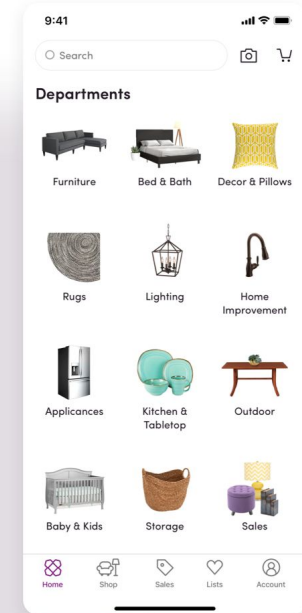

## Wayfair

Online Marketplace for furniture

Intuitive, covers many different brands, styles, and price ranges

Ability to create “projects” that you can choose furniture for?

Extremely popular as a furniture sourcing site

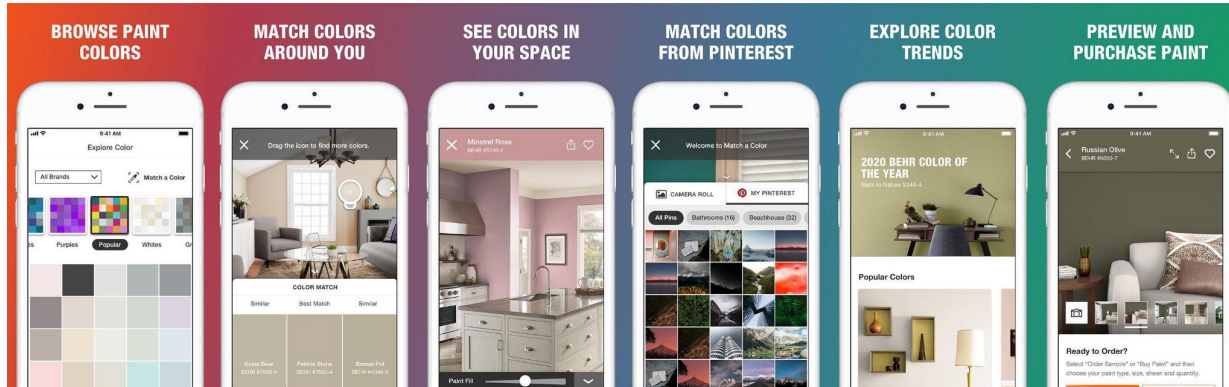

# Competitive Research

## Project Color by the Home Depot

Allows users to take their own pictures and analyzes the color, finding paints that match

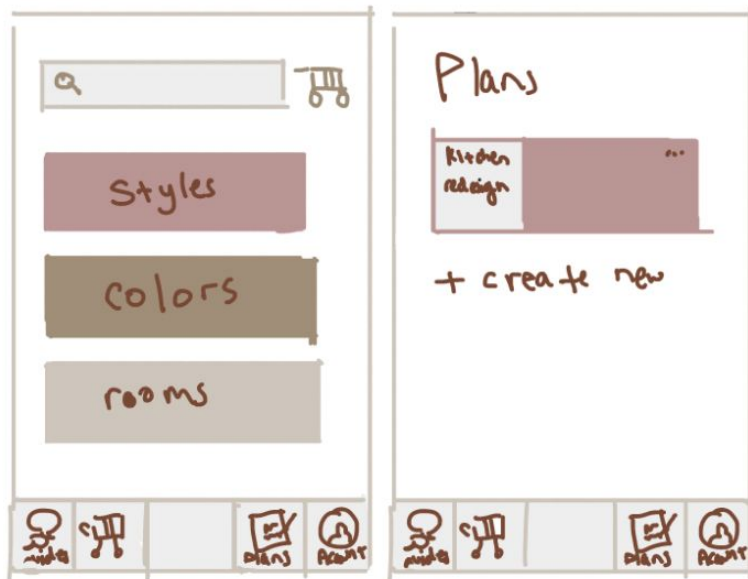

This solves the problem of not knowing what color of item you have.

# Design Treatment Reflections

To neutralize the style of the app, I was advised to change my typefaces to more universal, less stylized fonts. As an interior design app, it's important for the platform to be neutral.

I also got advice to add differentiation between already purchased and wishlist items to the planning section of the app.

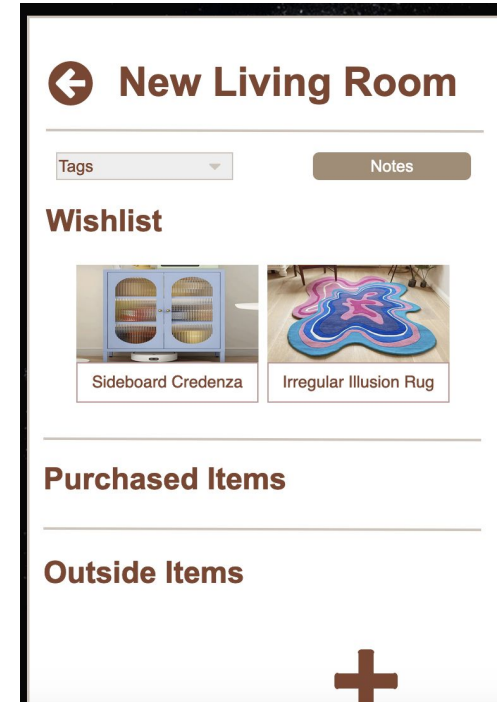

There were some concerns that I didn't have a homescreen nor a button for a home, and I've decided that this app doesn't necessarily need that to be successful. Instead, I want to focus on the functionality of the app. Landing on the shopping screen is intuitive enough, I believe, for most people to understand the layout.

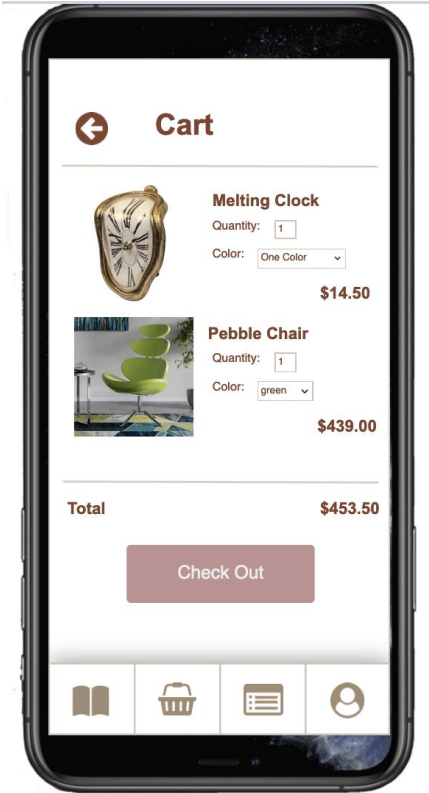

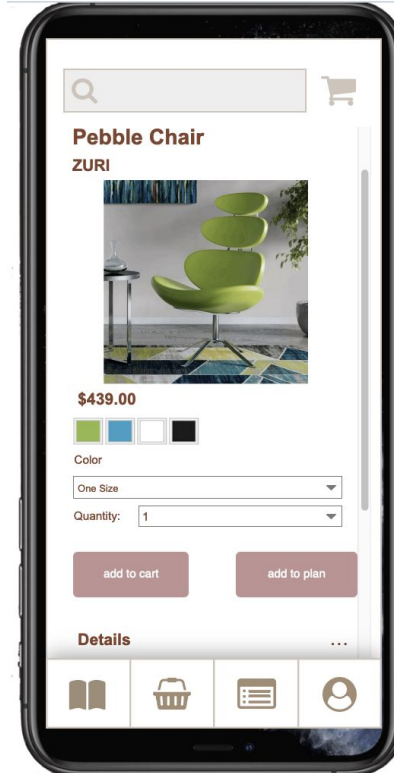

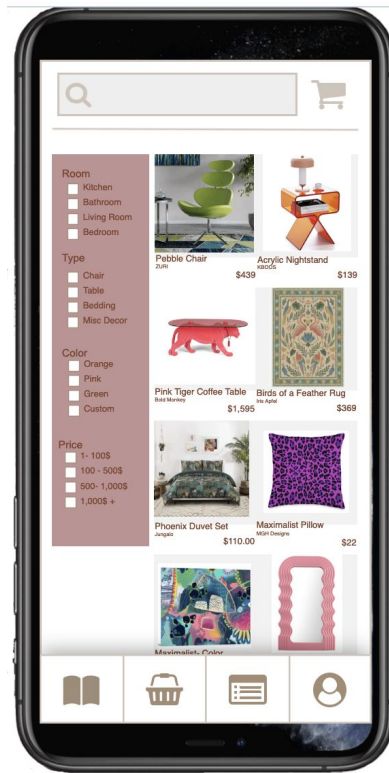

Examples of the new typefaces- Arial for headers, and Helvetica for body text. The color palette hasn't changed.
